Automating WLCG Job Accounting Validation ^[1]

Date published:

Friday, 16 December, 2016

Document type:

Summer student report

Author(s):

D. Christidis

The WLCG Accounting Task Force is overseeing the creation of a new accounting portal. One of the areas of work is to check the trustworthiness of the provided data. This is accomplished by making comparisons against the data from the accounting systems used by the LHC experiments. To that end, a script was created to perform these checks and publish the results online. Additional emphasis was given on making sure it is fully automated and on improving the visualisation of the results. The initial outcome has been positive and some accounting issues were discovered and fixed.
